Dear Mr. Evans,

I am writing you after finding the advert on Monster.com concerning the job opportunity of Sound Designer for eGames, offered by your company IN TOUCH GAMES LIMITED.

Considering eGames have always been my main target as job related environment, as I always have been passionate and interested about the industry, progressing my career in a position like the one you are offering would be totally exciting and satisfying, both personally and professionally.

Conform to the listed requirements, I have experience in composing, producing and designing music and sound effects for eGames and multimedia, generally intended for mobile devices. Additionally to editing, mixing and mastering independently on Pro Tools and other different DAWs, I have MIDI, a pretty wide plugins and game audio implementation (Unity and Wwise) knowledge.

I would be available to relocate in your Halesowen site, as the opportunity to work with your company and team would be the perfect progression for my career path.

Best regards,
Mauro Serra
